

torch.optim.adadelta.adadelta#

<https://pytorch.org/docs/stable/generated/torch.optim.adadelta.adadelta.html>

Description:

Functional API that performs Adadelta algorithm computation. See Adadelta for details.

Function Signature

```
torch.optim.adadelta.adadelta(params, grads, square_avgs,
acc_deltas, state_steps, capturable=False, foreach=None,
differentiable=False, has_complex=False, *, lr, rho, eps,
weight_decay, maximize)[source]#
```

Detailed Documentation

Documentation

Functional API that performs Adadelata algorithm computation.

See Adadelata for details.

Functional API that performs Adadelata algorithm computation.

See Adadelata for details.
