

torch.optim.adagrad.adagrad#

<https://pytorch.org/docs/stable/generated/torch.optim.adagrad.adagrad.html>

Description:

Functional API that performs Adagrad algorithm computation. See Adagrad for details.

Function Signature

```
torch.optim.adagrad.adagrad(params, grads, state_sums,
state_steps, fused=None, grad_scale=None, found_inf=None,
has_sparse_grad=False, foreach=None, differentiable=False,
has_complex=False, *, lr, weight_decay, lr_decay, eps,
maximize)[source]#
```

Detailed Documentation

Documentation

Functional API that performs Adagrad algorithm computation.

See Adagrad for details.

Functional API that performs Adagrad algorithm computation.

See Adagrad for details.
