

torch.optim.nadam.nadam#

<https://pytorch.org/docs/stable/generated/torch.optim.nadam.nadam.html>

Description:

Functional API that performs NAdam algorithm computation. See NAdam for details.

Function Signature

```
torch.optim.nadam.nadam(params, grads, exp_avgs,  
exp_avg_sqs, mu_products, state_steps,  
decoupled_weight_decay=False, foreach=None,  
capturable=False, differentiable=False, has_complex=False,  
maximize=False, *, beta1, beta2, lr, weight_decay,  
momentum_decay, eps)[source]#
```

Detailed Documentation

Documentation

Functional API that performs NAdam algorithm computation.
