

torch.optim.rmsprop.rmsprop#

<https://pytorch.org/docs/stable/generated/torch.optim.rmsprop.rmsprop.html>

Description:

Functional API that performs rmsprop algorithm computation. See RMSProp for details.

Function Signature

```
torch.optim.rmsprop.rmsprop(params, grads, square_avgs,
grad_avgs, momentum_buffer_list, state_steps, foreach=None,
maximize=False, differentiable=False, capturable=False,
has_complex=False, *, lr, alpha, eps, weight_decay,
momentum, centered)[source]#
```

Detailed Documentation

Documentation

Functional API that performs rmsprop algorithm computation.

See RMSProp for details.

Functional API that performs rmsprop algorithm computation.
