

torch.optim.rprop.rprop#

<https://pytorch.org/docs/stable/generated/torch.optim.rprop.rprop.html>

Description:

Functional API that performs rprop algorithm computation. See Rprop for details.

Function Signature

```
torch.optim.rprop.rprop(params, grads, prevs, step_sizes,
state_steps, foreach=None, capturable=False, maximize=False,
differentiable=False, has_complex=False, *, step_size_min,
step_size_max, etaminus, etaplus)[source]#
```

Detailed Documentation

Documentation

Functional API that performs rprop algorithm computation.

See Rprop for details.

Functional API that performs rprop algorithm computation.
