

python.object-model#

<https://pytorch.org/docs/stable/generated/exportdb/python.object-model.html>

Description:

Tags: python.object-model Support Level: NOT_SUPPORTED_YET

Original source code:

Code Examples

```

# mypy: allow-untyped-defs
import torch
from torch._export.db.case import SupportLevel

class ModelAttrMutation(torch.nn.Module):
    """
    Attribute mutation is not supported.
    """

    def __init__(self) -> None:
        super().__init__()
        self.attr_list = [torch.randn(3, 2), torch.randn(3, 2)]

    def recreate_list(self):
        return [torch.zeros(3, 2), torch.zeros(3, 2)]

    def forward(self, x):
        self.attr_list = self.recreate_list()
        return x.sum() + self.attr_list[0].sum()

example_args = (torch.randn(3, 2),)
tags = {"python.object-model"}
support_level = SupportLevel.NOT_SUPPORTED_YET
model = ModelAttrMutation()

torch.export.export(model, example_args)

```

```

AssertionError: Mutating module attribute attr_list during
export.

```

```
# mypy: allow-untyped-defs
import torch
from torch._export.db.case import SupportLevel

class OptionalInput(torch.nn.Module):
    """
    Tracing through optional input is not supported yet
    """

    def forward(self, x, y=torch.randn(2, 3)):
        if y is not None:
            return x + y
        return x

example_args = (torch.randn(2, 3),)
tags = {"python.object-model"}
support_level = SupportLevel.NOT_SUPPORTED_YET
model = OptionalInput()

torch.export.export(model, example_args)
```

Unsupported: Tracing through optional input is not supported yet
