

# torch.operator#

<https://pytorch.org/docs/stable/generated/exportdb/torch.operator.html>

## Description:

Support Level: NOT\_SUPPORTED\_YET Original source code:

## Code Examples

---

```
# mypy: allow-untyped-defs
import torch
from torch._export.db.case import SupportLevel

class TorchSymMin(torch.nn.Module):
    """
    torch.sym_min operator is not supported in export.
    """

    def forward(self, x):
        return x.sum() + torch.sym_min(x.size(0), 100)

example_args = (torch.randn(3, 2),)
tags = {"torch.operator"}
support_level = SupportLevel.NOT_SUPPORTED_YET
model = TorchSymMin()

torch.export.export(model, example_args)
```

```
Unsupported: torch.* op returned non-Tensor
```

## Notes & Warnings

---
