

torch.abs#

<https://pytorch.org/docs/stable/generated/torch.abs.html>

Description:

Computes the absolute value of each element in input. input (Tensor) – the input tensor. out (Tensor, optional) – the output tensor.

Function Signature

```
torch.abs(input: Tensor, *, out: Optional[Tensor]) → Tensor#
```

Parameters

Keyword Arguments

Parameters

Keyword

out (Tensor, optional) – the output tensor.

Code Examples

```
>>> torch.abs(torch.tensor([-1, -2, 3]))  
tensor([ 1,  2,  3])
```

Detailed Documentation

Documentation

Computes the absolute value of each element in input.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.

Computes the absolute value of each element in input.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.
