

torch.accelerator.current_stream#

[https://pytorch.org/docs/stable/generated/torch.accelerator.current_stream.h](https://pytorch.org/docs/stable/generated/torch.accelerator.current_stream.html)

Description:

Return the currently selected stream for a given device. device (torch.device, str, int, optional) – a given device that must match the current accelerator device type. If not given, use torch.accelerator.current_device_index() by default. the currently selected stream for a given device.

Function Signature

```
torch.accelerator.current_stream(device=None, /)[source]#
```

Parameters

Returns

Return type

Returns:

torch.Stream

Detailed Documentation

Documentation

Return the currently selected stream for a given device.

device (torch.device, str, int, optional) – a given device that must match the current accelerator device type. If not given, use `torch.accelerator.current_device_index()` by default.

the currently selected stream for a given device.

Return the currently selected stream for a given device.

device (torch.device, str, int, optional) – a given device that must match the current accelerator device type. If not given, use `torch.accelerator.current_device_index()` by default.

the currently selected stream for a given device.
