

torch.accelerator.device_count#

https://pytorch.org/docs/stable/generated/torch.accelerator.device_count.html

Description:

Return the number of current accelerator available. If there is no available accelerators, return 0.

Function Signature

```
torch.accelerator.device_count()[source]#
```

Returns

the number of the current accelerator available.

Return type

Returns:

int

Notes & Warnings

NOTE

Note This API delegates to the device-specific version of `device_count`. On CUDA, this API will NOT poison fork if NVML discovery succeeds. Otherwise, it will. For more details, see Poison fork in multiprocessing.

Detailed Documentation

Documentation

Return the number of current accelerator available.

If there is no available accelerators, return 0.

This API delegates to the device-specific version of `device_count`. On CUDA, this API will NOT poison fork if NVML discovery succeeds. Otherwise, it will. For more details, see Poison fork in multiprocessing.
