

torch.accelerator.memory.empty_cache#

https://pytorch.org/docs/stable/generated/torch.accelerator.memory.empty_cache.html

Description:

Release all unoccupied cached memory currently held by the caching allocator so that those can be used in other application. This function is a no-op if the memory allocator for the current accelerator has not been initialized.

Function Signature

```
torch.accelerator.memory.empty_cache()[source]#
```

Notes & Warnings

NOTE

Note This function is a no-op if the memory allocator for the current accelerator has not been initialized.
