

ConvBn1d#

[https://pytorch.org/docs/stable/generated/torch.nn.intrinsic.qat.ConvBn1d](https://pytorch.org/docs/stable/generated/torch.nn.intrinsic.qat.ConvBn1d.html)

Description:

A ConvBn1d module is a module fused from Conv1d and BatchNorm1d, attached with FakeQuantize modules for weight, used in quantization aware training. We combined the interface of torch.nn.Conv1d and torch.nn.BatchNorm1d. Similar to torch.nn.Conv1d, with FakeQuantize modules initialized to default. weight_fake_quant – fake quant module for weight

Function Signature

```
class torch.nn.intrinsic.qat.ConvBn1d(in_channels,
out_channels, kernel_size, stride=1, padding=0, dilation=1,
groups=1, bias=None, padding_mode='zeros', eps=1e-05,
momentum=0.1, freeze_bn=False, qconfig=None)[source]#
```

Variables

Detailed Documentation

Documentation

A ConvBn1d module is a module fused from Conv1d and BatchNorm1d, attached with FakeQuantize modules for weight, used in quantization aware training.

We combined the interface of torch.nn.Conv1d and torch.nn.BatchNorm1d.

Similar to torch.nn.Conv1d, with FakeQuantize modules initialized to default.

weight_fake_quant – fake quant module for weight

A ConvBn1d module is a module fused from Conv1d and BatchNorm1d, attached with FakeQuantize modules for weight, used in quantization aware training.

We combined the interface of torch.nn.Conv1d and torch.nn.BatchNorm1d.

Similar to torch.nn.Conv1d, with FakeQuantize modules initialized to default.
