

# ConvBnReLU3d#

<https://pytorch.org/docs/stable/generated/torch.nn.intrinsic.qat.ConvBnReLU3d.html>

## Description:

A `ConvBnReLU3d` module is a module fused from `Conv3d`, `BatchNorm3d` and `ReLU`, attached with `FakeQuantize` modules for weight, used in quantization aware training. We combined the interface of `torch.nn.Conv3d` and `torch.nn.BatchNorm3d` and `torch.nn.ReLU`. Similar to `torch.nn.Conv3d`, with `FakeQuantize` modules initialized to default.

`weight_fake_quant` – fake quant module for weight

## Function Signature

---

```
class torch.nn.intrinsic.qat.ConvBnReLU3d(in_channels,
out_channels, kernel_size, stride=1, padding=0, dilation=1,
groups=1, bias=None, padding_mode='zeros', eps=1e-05,
momentum=0.1, freeze_bn=False, qconfig=None)[source]#
```

Variables

# Detailed Documentation

## Documentation

A ConvBnReLU3d module is a module fused from Conv3d, BatchNorm3d and ReLU, attached with FakeQuantize modules for weight, used in quantization aware training.

We combined the interface of `torch.nn.Conv3d` and `torch.nn.BatchNorm3d` and `torch.nn.ReLU`.

Similar to `torch.nn.Conv3d`, with FakeQuantize modules initialized to default.

`weight_fake_quant` – fake quant module for weight

A ConvBnReLU3d module is a module fused from Conv3d, BatchNorm3d and ReLU, attached with FakeQuantize modules for weight, used in quantization aware training.

We combined the interface of `torch.nn.Conv3d` and `torch.nn.BatchNorm3d` and `torch.nn.ReLU`.

Similar to `torch.nn.Conv3d`, with FakeQuantize modules initialized to default.
