

Linear#

<https://pytorch.org/docs/stable/generated/torch.nn.qat.dynamic.Linear.html>

Description:

A linear module attached with FakeQuantize modules for weight, used for dynamic quantization aware training. We adopt the same interface as `torch.nn.Linear`, please see <https://pytorch.org/docs/stable/nn.html#torch.nn.Linear> for documentation. Similar to `torch.nn.Linear`, with FakeQuantize modules initialized to default.

Function Signature

```
class torch.nn.qat.dynamic.Linear(in_features,  
out_features, bias=True, qconfig=None, device=None,  
dtype=None)[source]#
```

Detailed Documentation

Documentation

A linear module attached with FakeQuantize modules for weight, used for dynamic quantization aware training.

We adopt the same interface as `torch.nn.Linear`, please see <https://pytorch.org/docs/stable/nn.html#torch.nn.Linear> for documentation.

Similar to `torch.nn.Linear`, with FakeQuantize modules initialized to default.

A linear module attached with FakeQuantize modules for weight, used for dynamic quantization aware training.

We adopt the same interface as `torch.nn.Linear`, please see <https://pytorch.org/docs/stable/nn.html#torch.nn.Linear> for documentation.
