

LeakyReLU#

[https://pytorch.org/docs/stable/generated/torch.nn.quantized.LeakyReLU.ht](https://pytorch.org/docs/stable/generated/torch.nn.quantized.LeakyReLU.html)

Description:

This is the quantized equivalent of LeakyReLU. `scale` (float) – quantization scale of the output tensor `zero_point` (int) – quantization zero point of the output tensor `negative_slope` (float) – Controls the angle of the negative slope. Default: 1e-2

Function Signature

```
class torch.nn.quantized.LeakyReLU(scale, zero_point,  
negative_slope=0.01, inplace=False, device=None, dtype=None)  
[source]#
```

Parameters

Detailed Documentation

Documentation

This is the quantized equivalent of LeakyReLU.

scale (float) – quantization scale of the output tensor

zero_point (int) – quantization zero point of the output tensor

negative_slope (float) – Controls the angle of the negative slope. Default: 1e-2

This is the quantized equivalent of LeakyReLU.
