

clamp#

<https://pytorch.org/docs/stable/generated/torch.nn.quantized.functional.clamp.html>

Description:

`float(input, min_, max_) -> Tensor` Applies the clamp function element-wise. See `clamp` for more details. `input` (Tensor) – quantized input `min` – minimum value for clamping `max` – maximum value for clamping

Function Signature

```
class torch.nn.quantized.functional.clamp(input, min_,  
max_)[source]#
```

Parameters

Return type

Returns:

Tensor

Detailed Documentation

Documentation

`float(input, min_, max_) -> Tensor`

Applies the clamp function element-wise. See `clamp` for more details.

`input (Tensor)` – quantized input

`min` – minimum value for clamping

`max` – maximum value for clamping

`float(input, min_, max_) -> Tensor`

Applies the clamp function element-wise. See `clamp` for more details.

`input (Tensor)` – quantized input

`input (Tensor)` – quantized input

`min` – minimum value for clamping

`min` – minimum value for clamping

`max` – maximum value for clamping

`max` – maximum value for clamping
