

leaky_relu#

https://pytorch.org/docs/stable/generated/torch.nn.quantized.functional.leaky_relu.html

Description:

Quantized version of the `leaky_relu(input, negative_slope=0.01, inplace=False, scale, zero_point) -> Tensor`. Applies element-wise, $\text{LeakyReLU}(x) = \max(0, x) + \text{negative_slope} * \min(0, x)$.
$$\text{LeakyReLU}(x) = \max(0, x) + \text{negative_slope} * \min(0, x)$$

input (Tensor) – Quantized input
negative_slope (float) – The slope of the negative input
inplace (bool) – Inplace modification of the input tensor

Function Signature

```
class torch.nn.quantized.functional.leaky_relu(input,
negative_slope=0.01, inplace=False, scale=None,
zero_point=None)[source]#
```

Parameters

Detailed Documentation

Documentation

Quantized version of the. `leaky_relu(input, negative_slope=0.01, inplace=False, scale, zero_point) -> Tensor`

Applies element-wise,
$$\text{LeakyReLU}(x) = \max(0, x) + \text{negative_slope} * \min(0, x)$$
$$\text{LeakyReLU}(x) = \max(0, x) + \text{negative_slope} * \min(0, x)$$

`input` (Tensor) – Quantized input

`negative_slope` (float) – The slope of the negative input

`inplace` (bool) – Inplace modification of the input tensor

`scale` (Optional[float]) – Scale and zero point of the output tensor.

`zero_point` (Optional[int]) – Scale and zero point of the output tensor.

See `LeakyReLU` for more details.
