

max_pool2d#

https://pytorch.org/docs/stable/generated/torch.nn.quantized.functional.max_pool2d.html

Description:

Applies a 2D max pooling over a quantized input signal composed of several quantized input planes. The input quantization parameters are propagated to the output. See MaxPool2d for details.

Function Signature

```
class torch.nn.quantized.functional.max_pool2d(input,
kernel_size, stride=None, padding=0, dilation=1,
ceil_mode=False, return_indices=False)[source]#
```

Notes & Warnings

NOTE

The input quantization parameters are propagated to the output.

Detailed Documentation

Documentation

Applies a 2D max pooling over a quantized input signal composed of several quantized input planes.

The input quantization parameters are propagated to the output.

See `MaxPool2d` for details.

Applies a 2D max pooling over a quantized input signal composed of several quantized input planes.

The input quantization parameters are propagated to the output.

See `MaxPool2d` for details.
