

default_eval_fn#

[https://pytorch.org/docs/stable/generated/torch.ao.quantization.default_eval](https://pytorch.org/docs/stable/generated/torch.ao.quantization.default_eval_fn.html)

Description:

Define the default evaluation function. Default evaluation function takes a `torch.utils.data.Dataset` or a list of input Tensors and run the model on the dataset

Function Signature

```
class torch.ao.quantization.default_eval_fn(model,  
calib_data)[source]#
```

Detailed Documentation

Documentation

Define the default evaluation function.

Default evaluation function takes a `torch.utils.data.Dataset` or a list of input Tensors and run the model on the dataset

Define the default evaluation function.

Default evaluation function takes a `torch.utils.data.Dataset` or a list of input Tensors and run the model on the dataset
