

PerBlock#

<https://pytorch.org/docs/stable/generated/torch.ao.quantization.observer.PerBlock.html>

Description:

Represents per-block granularity in quantization. See `quantize_affine()` for docs for `block_size` `block_size` (`Tuple[int, ...]`) – The size of each quantization group

Function Signature

```
class torch.ao.quantization.observer.PerBlock(block_size)
[source]#
```

Variables

Detailed Documentation

Documentation

Represents per-block granularity in quantization. See `quantize_affine()` for docs for `block_size`

`block_size` (Tuple[int, ...]) – The size of each quantization group

Represents per-block granularity in quantization. See `quantize_affine()` for docs for `block_size`
