

PerTensor#

<https://pytorch.org/docs/stable/generated/torch.ao.quantization.observer.PerTensor.html>

Description:

Represents per-tensor granularity in quantization. This granularity type calculates the quantization parameters based off the entire tensor.

Function Signature

```
class torch.ao.quantization.observer.PerTensor[source]#
```

Detailed Documentation

Documentation

Represents per-tensor granularity in quantization.

This granularity type calculates the quantization parameters based off the entire tensor.

Represents per-tensor granularity in quantization.

This granularity type calculates the quantization parameters based off the entire tensor.
