

default_per_channel_weight_observer#

https://pytorch.org/docs/stable/generated/torch.ao.quantization.observer.default_per_channel_weight_observer.html

Description:

Default per-channel weight observer, usually used on backends where per-channel weight quantization is supported, such as fbgemm.

Function Signature

```
torch.ao.quantization.observer.default_per_channel_weight_observer#
```

Detailed Documentation

Documentation

Default per-channel weight observer, usually used on backends where per-channel weight quantization is supported, such as fbgemm.

Default per-channel weight observer, usually used on backends where per-channel weight quantization is supported, such as fbgemm.
