

prepare_for_propagation_comparison#

https://pytorch.org/docs/stable/generated/torch.ao.quantization.prepare_for_

Description:

Add output loggers to node that has `numeric_debug_handle` model (GraphModule) – original model a model with output loggers for all nodes that has `numeric_debug_handle_id`

Function Signature

```
class  
torch.ao.quantization.prepare_for_propagation_comparison(mod  
el)[source]#
```

Parameters

Returns

Return type

Returns:

GraphModule

Detailed Documentation

Documentation

Add output loggers to node that has numeric_debug_handle

model (GraphModule) – original model

a model with output loggers for all nodes that has numeric_debug_handle_id

Add output loggers to node that has numeric_debug_handle

model (GraphModule) – original model

a model with output loggers for all nodes that has numeric_debug_handle_id
