

get_default_qconfig_mapping#

[https://pytorch.org/docs/stable/generated/torch.ao.quantization.qconfig_mapping](https://pytorch.org/docs/stable/generated/torch.ao.quantization.qconfig_mapping.get_default_qconfig_mapping.html)

Description:

Return the default QConfigMapping for post training quantization.

backend (*) – the quantization backend for the default qconfig mapping, should be one of ["x86" (default), "fbgemm", "qnnpack", "onednn"]

version (*) – the version for the default qconfig mapping

Function Signature

```
class
torch.ao.quantization.qconfig_mapping.get_default_qconfig_ma
pping(backend='x86', version=0)[source]#
```

Parameters

Return type

Returns:

QConfigMapping

Detailed Documentation

Documentation

Return the default QConfigMapping for post training quantization.

backend (*) – the quantization backend for the default qconfig mapping, should be one of ["x86" (default), "fbgemm", "qnnpack", "onednn"]

version (*) – the version for the default qconfig mapping

Return the default QConfigMapping for post training quantization.
