

torch.bitwise_not#

https://pytorch.org/docs/stable/generated/torch.bitwise_not.html

Description:

Computes the bitwise NOT of the given input tensor. The input tensor must be of integral or Boolean types. For bool tensors, it computes the logical NOT. input (Tensor) – the input tensor. out (Tensor, optional) – the output tensor.

Function Signature

```
torch.bitwise_not(input, *, out=None) → Tensor#
```

Parameters

Keyword Arguments

Parameters

Keyword

out (Tensor, optional) – the output tensor.

Code Examples

```
>>> torch.bitwise_not(torch.tensor([-1, -2, 3],  
dtype=torch.int8))  
tensor([ 0,  1, -4], dtype=torch.int8)
```

Detailed Documentation

Documentation

Computes the bitwise NOT of the given input tensor. The input tensor must be of integral or Boolean types. For bool tensors, it computes the logical NOT.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.

Computes the bitwise NOT of the given input tensor. The input tensor must be of integral or Boolean types. For bool tensors, it computes the logical NOT.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.
