

torch.broadcast_tensors#

https://pytorch.org/docs/stable/generated/torch.broadcast_tensors.html

Description:

Broadcasts the given tensors according to Broadcasting semantics.

*tensors – any number of tensors of the same type More than one element of a broadcasted tensor may refer to a single memory location.

As a result, in-place operations (especially ones that are vectorized) may result in incorrect behavior. If you need to write to the tensors, please clone them first.

Function Signature

`torch.broadcast_tensors(*tensors) → List of Tensors[source]`#

Parameters

Code Examples

```
>>> x = torch.arange(3).view(1, 3)
>>> y = torch.arange(2).view(2, 1)
>>> a, b = torch.broadcast_tensors(x, y)
>>> a.size()
torch.Size([2, 3])
>>> a
tensor([[0, 1, 2],
        [0, 1, 2]])
```

Notes & Warnings

WARNING

Warning More than one element of a broadcasted tensor may refer to a single memory location. As a result, in-place operations (especially ones that are vectorized) may result in incorrect behavior. If you need to write to the tensors, please clone them first.
