

torch.can_cast#

https://pytorch.org/docs/stable/generated/torch.can_cast.html

Description:

Determines if a type conversion is allowed under PyTorch casting rules described in the type promotion documentation. `from_ (dtype)` – The original `torch.dtype`. `to (dtype)` – The target `torch.dtype`.

Function Signature

```
torch.can_cast(from_, to) → bool#
```

Parameters

Code Examples

```
>>> torch.can_cast(torch.double, torch.float)
True
>>> torch.can_cast(torch.float, torch.int)
False
```

Detailed Documentation

Documentation

Determines if a type conversion is allowed under PyTorch casting rules described in the type promotion documentation.

`from_ (dtype)` – The original `torch.dtype`.

`to (dtype)` – The target `torch.dtype`.

Determines if a type conversion is allowed under PyTorch casting rules described in the type promotion documentation.

`from_ (dtype)` – The original `torch.dtype`.

`from_ (dtype)` – The original `torch.dtype`.

`to (dtype)` – The target `torch.dtype`.

`to (dtype)` – The target `torch.dtype`.
