

torch.ceil#

<https://pytorch.org/docs/stable/generated/torch.ceil.html>

Description:

Returns a new tensor with the ceil of the elements of input, the smallest integer greater than or equal to each element. For integer inputs, follows the array-api convention of returning a copy of the input tensor. input (Tensor) – the input tensor. out (Tensor, optional) – the output tensor.

Function Signature

```
torch.ceil(input, *, out=None) → Tensor#
```

Parameters

Keyword Arguments

Parameters

Keyword

out (Tensor, optional) – the output tensor.

Code Examples

```
>>> a = torch.randn(4)
>>> a
tensor([-0.6341, -1.4208, -1.0900,  0.5826])
>>> torch.ceil(a)
tensor([-0., -1., -1.,  1.])
```

Detailed Documentation

Documentation

Returns a new tensor with the ceil of the elements of input, the smallest integer greater than or equal to each element.

For integer inputs, follows the array-api convention of returning a copy of the input tensor.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.

Returns a new tensor with the ceil of the elements of input, the smallest integer greater than or equal to each element.

For integer inputs, follows the array-api convention of returning a copy of the input tensor.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.
