

torch.compiler.is_compiling#

https://pytorch.org/docs/stable/generated/torch.compiler.is_compiling.html

Description:

Indicates whether a graph is executed/traced as part of `torch.compile()` or `torch.export()`.
`torch._dynamo.external_utils.is_compiling()`
`torch._utils.is_compiling()`

Function Signature

```
torch.compiler.is_compiling()[source]#
```

Note that there are 2 other related flags that should be deprecated eventually:

Return type

Returns:

bool

Code Examples

```
>>> def forward(self, x):
>>>     if not torch.compiler.is_compiling():
>>>         pass # ...logic that is not needed in a
>>>         compiled/traced graph...
>>>
>>>     # ...rest of the function...
```

Detailed Documentation

Documentation

Indicates whether a graph is executed/traced as part of `torch.compile()` or `torch.export()`.

`torch._dynamo.external_utils.is_compiling()`

`torch._utils.is_compiling()`

Indicates whether a graph is executed/traced as part of `torch.compile()` or `torch.export()`.

`torch._dynamo.external_utils.is_compiling()`

`torch._dynamo.external_utils.is_compiling()`

`torch._utils.is_compiling()`

`torch._utils.is_compiling()`
