

torch.compiler.is_dynamo_compiling#

https://pytorch.org/docs/stable/generated/torch.compiler.is_dynamo_compiling

Description:

Indicates whether a graph is traced via TorchDynamo. It's stricter than `is_compiling()` flag, as it would only be set to `True` when TorchDynamo is used.

Function Signature

```
torch.compiler.is_dynamo_compiling()[source]#
```

Return type

Returns:

bool

Code Examples

```
>>> def forward(self, x):
>>>     if not torch.compiler.is_dynamo_compiling():
>>>         pass # ...logic that is not needed in a TorchDynamo-
traced graph...
>>>
>>>     # ...rest of the function...
```

Detailed Documentation

Documentation

Indicates whether a graph is traced via TorchDynamo.

It's stricter than `is_compiling()` flag, as it would only be set to `True` when TorchDynamo is used.

Indicates whether a graph is traced via TorchDynamo.

It's stricter than `is_compiling()` flag, as it would only be set to `True` when TorchDynamo is used.
