

torch.compiler.skip_guard_on_globals_unsafe

https://pytorch.org/docs/stable/generated/torch.compiler.skip_guard_on_globals_unsafe.html

Description:

A common function to skip guards on all globals. This is unsafe to use by default. But if you don't expect any changes in the globals, you can just keep the tensor guards. >> opt_mod = torch.compile(>> mod, >> options={"guard_filter_fn": torch.compiler.skip_guard_on_globals_unsafe}, >>)

Function Signature

```
torch.compiler.skip_guard_on_globals_unsafe(guard_entries)
[source]#
```

Detailed Documentation

Documentation

A common function to skip guards on all globals. This is unsafe to use by default. But if you don't expect any changes in the globals, you can just keep the tensor guards.

```
>> opt_mod = torch.compile( >> mod, >> options={"guard_filter_fn":  
torch.compiler.skip_guard_on_globals}, >> )
```

A common function to skip guards on all globals. This is unsafe to use by default. But if you don't expect any changes in the globals, you can just keep the tensor guards.

```
>> opt_mod = torch.compile( >> mod, >> options={"guard_filter_fn":  
torch.compiler.skip_guard_on_globals}, >> )
```
