

torch.cpu.current_stream#

https://pytorch.org/docs/stable/generated/torch.cpu.current_stream.html

Description:

Returns the currently selected Stream for a given device. device (torch.device or int, optional) – Ignored. N.B. This function only exists to facilitate device-agnostic code

Function Signature

```
torch.cpu.current_stream(device=None)[source]#
```

Parameters

Return type

Returns:

Stream

Detailed Documentation

Documentation

Returns the currently selected Stream for a given device.

device (torch.device or int, optional) – Ignored.

N.B. This function only exists to facilitate device-agnostic code

Returns the currently selected Stream for a given device.

device (torch.device or int, optional) – Ignored.

N.B. This function only exists to facilitate device-agnostic code
