

torch.cpu.synchronize#

<https://pytorch.org/docs/stable/generated/torch.cpu.synchronize.html>

Description:

Waits for all kernels in all streams on the CPU device to complete. device (torch.device or int, optional) – ignored, there's only one CPU device. N.B. This function only exists to facilitate device-agnostic code.

Function Signature

```
torch.cpu.synchronize(device=None)[source]#
```

Parameters

Detailed Documentation

Documentation

Waits for all kernels in all streams on the CPU device to complete.

device (torch.device or int, optional) – ignored, there's only one CPU device.

N.B. This function only exists to facilitate device-agnostic code.

Waits for all kernels in all streams on the CPU device to complete.

device (torch.device or int, optional) – ignored, there's only one CPU device.

N.B. This function only exists to facilitate device-agnostic code.
