

torch.dequantize#

<https://pytorch.org/docs/stable/generated/torch.dequantize.html>

Description:

Returns an fp32 Tensor by dequantizing a quantized Tensor tensor (Tensor) – A quantized Tensor Given a list of quantized Tensors, dequantize them and return a list of fp32 Tensors tensors (sequence of Tensors) – A list of quantized Tensors

Function Signature

`torch.dequantize(tensor) → Tensor#`

Parameters

`torch.dequantize(tensors) → sequence of Tensors`

Parameters

Detailed Documentation

Documentation

Returns an fp32 Tensor by dequantizing a quantized Tensor

tensor (Tensor) – A quantized Tensor

Given a list of quantized Tensors, dequantize them and return a list of fp32 Tensors

tensors (sequence of Tensors) – A list of quantized Tensors

Returns an fp32 Tensor by dequantizing a quantized Tensor

tensor (Tensor) – A quantized Tensor

Given a list of quantized Tensors, dequantize them and return a list of fp32 Tensors

tensors (sequence of Tensors) – A list of quantized Tensors
