

torch.dstack#

<https://pytorch.org/docs/stable/generated/torch.dstack.html>

Description:

Stack tensors in sequence depthwise (along third axis). This is equivalent to concatenation along the third axis after 1-D and 2-D tensors have been reshaped by `torch.atleast_3d()`. tensors (sequence of Tensors) – sequence of tensors to concatenate out (Tensor, optional) – the output tensor.

Function Signature

```
torch.dstack(tensors, *, out=None) → Tensor#
```

Parameters

Keyword Arguments

Parameters

Keyword

out (Tensor, optional) – the output tensor.

Code Examples

```
>>> a = torch.tensor([1, 2, 3])
>>> b = torch.tensor([4, 5, 6])
>>> torch.dstack((a,b))
tensor([[[1, 4],
         [2, 5],
         [3, 6]]])
>>> a = torch.tensor([[1],[2],[3]])
>>> b = torch.tensor([[4],[5],[6]])
>>> torch.dstack((a,b))
tensor([[[1, 4]],
        [[2, 5]],
        [[3, 6]]])
```

Detailed Documentation

Documentation

Stack tensors in sequence depthwise (along third axis).

This is equivalent to concatenation along the third axis after 1-D and 2-D tensors have been reshaped by `torch.atleast_3d()`.

tensors (sequence of Tensors) – sequence of tensors to concatenate

out (Tensor, optional) – the output tensor.

Stack tensors in sequence depthwise (along third axis).

This is equivalent to concatenation along the third axis after 1-D and 2-D tensors have been reshaped by `torch.atleast_3d()`.

tensors (sequence of Tensors) – sequence of tensors to concatenate

out (Tensor, optional) – the output tensor.
