

torch.exp#

<https://pytorch.org/docs/stable/generated/torch.exp.html>

Description:

Returns a new tensor with the exponential of the elements of the input tensor input. input (Tensor) – the input tensor. out (Tensor, optional) – the output tensor.

Function Signature

```
torch.exp(input, *, out=None) → Tensor#
```

Parameters

Keyword Arguments

Parameters

Keyword

out (Tensor, optional) – the output tensor.

Code Examples

```
>>> torch.exp(torch.tensor([0, math.log(2.)]))  
tensor([ 1.,  2.])
```

Detailed Documentation

Documentation

Returns a new tensor with the exponential of the elements of the input tensor input.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.

Returns a new tensor with the exponential of the elements of the input tensor input.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.
