

torch.frac#

<https://pytorch.org/docs/stable/generated/torch.frac.html>

Description:

Computes the fractional portion of each element in input.

Function Signature

```
torch.frac(input, *, out=None) → Tensor#
```

Code Examples

```
>>> torch.frac(torch.tensor([1, 2.5, -3.2]))  
tensor([ 0.0000,  0.5000, -0.2000])
```

Detailed Documentation

Documentation

Computes the fractional portion of each element in input.

Computes the fractional portion of each element in input.
