

StatelessSymbolicContext#

https://pytorch.org/docs/stable/generated/torch.fx.experimental.symbolic_shapes.StatelessSymbolicContext.html

Description:

Create symbols in `create_symbolic_sizes_strides_storage_offset` via a `symbolic_context` determination as given by `DimDynamic` and `DimConstraint`. This will cause fresh symbols to be allocated

Function Signature

```
class
torch.fx.experimental.symbolic_shapes.StatelessSymbolicContext(
    dynamic_sizes, dynamic_strides=None,
    constraint_sizes=None, constraint_strides=None,
    specialize_on=None, view_base_context=None)[source]#
```

Detailed Documentation

Documentation

Create symbols in `create_symbolic_sizes_strides_storage_offset` via a `symbolic_context` determination as given by `DimDynamic` and `DimConstraint`. This will cause fresh symbols to be allocated

Create symbols in `create_symbolic_sizes_strides_storage_offset` via a `symbolic_context` determination as given by `DimDynamic` and `DimConstraint`. This will cause fresh symbols to be allocated
