

torch.fx.experimental.symbolic_shapes.c

https://pytorch.org/docs/stable/generated/torch.fx.experimental.symbolic_shapes

Description:

Test that two “meta” values (typically either Tensor or SymInt) have the same values, e.g., after retracing. If we don’t understand the quantities in question, we’ll just skip the consistency check.

Function Signature

```
torch.fx.experimental.symbolic_shapes.check_consistent(new,  
old)[source]#
```

Detailed Documentation

Documentation

Test that two “meta” values (typically either Tensor or SymInt) have the same values, e.g., after retracing. If we don’t understand the quantities in question, we’ll just skip the consistency check.

Test that two “meta” values (typically either Tensor or SymInt) have the same values, e.g., after retracing. If we don’t understand the quantities in question, we’ll just skip the consistency check.
