

torch.fx.experimental.symbolic_shapes.has_static_value

https://pytorch.org/docs/stable/generated/torch.fx.experimental.symbolic_shapes.has_static_value.html

Description:

User-code friendly utility to check if a value is static or dynamic. Returns true if given a constant, or a symbolic expression with a fixed value. a (Union[SymBool, SymFloat, SymInt, bool, float, int]) – Object to test

Function Signature

```
torch.fx.experimental.symbolic_shapes.has_static_value(a)
[source]#
```

Parameters

Return type

Returns:

bool

Detailed Documentation

Documentation

User-code friendly utility to check if a value is static or dynamic. Returns true if given a constant, or a symbolic expression with a fixed value.

`a (Union[SymBool, SymFloat, SymInt, bool, float, int])` – Object to test

User-code friendly utility to check if a value is static or dynamic. Returns true if given a constant, or a symbolic expression with a fixed value.

`a (Union[SymBool, SymFloat, SymInt, bool, float, int])` – Object to test
