

torch.fx.experimental.symbolic_shapes.is

https://pytorch.org/docs/stable/generated/torch.fx.experimental.symbolic_shapes.is

Description:

Helper function to determine if a node is trying to access a symbolic integer such as size, stride, offset or item. Currently primarily only used in a DCE pass to figure out purity.

Function Signature

```
torch.fx.experimental.symbolic_shapes.is_accessor_node(node)
[source]#
```

Return type

Returns:

bool
