

torch.fx.experimental.symbolic_shapes.is_concrete_float

https://pytorch.org/docs/stable/generated/torch.fx.experimental.symbolic_shapes.is_concrete_float.html

Description:

Utility to check if underlying object in SymInt is concrete value. Also returns true if integer is passed in. a (SymInt or float) – Object to test if it float

Function Signature

```
torch.fx.experimental.symbolic_shapes.is_concrete_float(a)  
[source]#
```

Parameters

Return type

Returns:

bool

Detailed Documentation

Documentation

Utility to check if underlying object in SymInt is concrete value. Also returns true if integer is passed in.

a (SymInt or float) – Object to test if it float

Utility to check if underlying object in SymInt is concrete value. Also returns true if integer is passed in.

a (SymInt or float) – Object to test if it float
