

# torch.get\_default\_dtype#

[https://pytorch.org/docs/stable/generated/torch.get\\_default\\_dtype.html](https://pytorch.org/docs/stable/generated/torch.get_default_dtype.html)

## Description:

Get the current default floating point torch.dtype.

## Function Signature

---

```
torch.get_default_dtype() → torch.dtype#
```

## Code Examples

---

```
>>> torch.get_default_dtype() # initial default for floating
point is torch.float32
torch.float32
>>> torch.set_default_dtype(torch.float64)
>>> torch.get_default_dtype() # default is now changed to
torch.float64
torch.float64
```

# Detailed Documentation

---

## Documentation

Get the current default floating point torch.dtype.

Get the current default floating point torch.dtype.
