

torch.get_rng_state#

https://pytorch.org/docs/stable/generated/torch.get_rng_state.html

Description:

Returns the random number generator state as a torch.ByteTensor. The returned state is for the default generator on CPU only. See also: torch.random.fork_rng().

Function Signature

```
torch.get_rng_state()[source]#
```

Return type

Returns:

Tensor

Notes & Warnings

NOTE

Note The returned state is for the default generator on CPU only.

Detailed Documentation

Documentation

Returns the random number generator state as a `torch.ByteTensor`.

The returned state is for the default generator on CPU only.

See also: `torch.random.fork_rng()`.

Returns the random number generator state as a `torch.ByteTensor`.

The returned state is for the default generator on CPU only.
