

torch.hstack#

<https://pytorch.org/docs/stable/generated/torch.hstack.html#torch.hstack>

Description:

Stack tensors in sequence horizontally (column wise). This is equivalent to concatenation along the first axis for 1-D tensors, and along the second axis for all other tensors. tensors (sequence of Tensors) – sequence of tensors to concatenate out (Tensor, optional) – the output tensor.

Function Signature

```
torch.hstack(tensors, *, out=None) → Tensor#
```

Parameters

Keyword Arguments

Parameters

Keyword

out (Tensor, optional) – the output tensor.

Code Examples

```
>>> a = torch.tensor([1, 2, 3])
>>> b = torch.tensor([4, 5, 6])
>>> torch.hstack((a,b))
tensor([1, 2, 3, 4, 5, 6])
>>> a = torch.tensor([[1],[2],[3]])
>>> b = torch.tensor([[4],[5],[6]])
>>> torch.hstack((a,b))
tensor([[1, 4],
        [2, 5],
        [3, 6]])
```

Detailed Documentation

Documentation

Stack tensors in sequence horizontally (column wise).

This is equivalent to concatenation along the first axis for 1-D tensors, and along the second axis for all other tensors.

tensors (sequence of Tensors) – sequence of tensors to concatenate

out (Tensor, optional) – the output tensor.

Stack tensors in sequence horizontally (column wise).

This is equivalent to concatenation along the first axis for 1-D tensors, and along the second axis for all other tensors.

tensors (sequence of Tensors) – sequence of tensors to concatenate

out (Tensor, optional) – the output tensor.
