

torch.isinf#

<https://pytorch.org/docs/stable/generated/torch.isinf.html>

Description:

Tests if each element of input is infinite (positive or negative infinity) or not. Complex values are infinite when their real or imaginary part is infinite. input (Tensor) – the input tensor. A boolean tensor that is True where input is infinite and False elsewhere

Function Signature

`torch.isinf(input) → Tensor#`

Parameters

Returns

Returns:

A boolean tensor that is True where input is infinite and False elsewhere

Code Examples

```
>>> torch.isinf(torch.tensor([1, float('inf'), 2, float('-inf'),  
float('nan')]))  
tensor([False,  True,  False,  True,  False])
```

Notes & Warnings

NOTE

Note Complex values are infinite when their real or imaginary part is infinite.

Detailed Documentation

Documentation

Tests if each element of input is infinite (positive or negative infinity) or not.

Complex values are infinite when their real or imaginary part is infinite.

input (Tensor) – the input tensor.

A boolean tensor that is True where input is infinite and False elsewhere

Tests if each element of input is infinite (positive or negative infinity) or not.
