

torch.lgamma#

<https://pytorch.org/docs/stable/generated/torch.lgamma.html>

Description:

Computes the natural logarithm of the absolute value of the gamma function on input. input (Tensor) – the input tensor. out (Tensor, optional) – the output tensor.

Function Signature

```
torch.lgamma(input, *, out=None) → Tensor#
```

Parameters

Keyword Arguments

Parameters

Keyword

out (Tensor, optional) – the output tensor.

Code Examples

```
>>> a = torch.arange(0.5, 2, 0.5)
>>> torch.lgamma(a)
tensor([ 0.5724,  0.0000, -0.1208])
```

Detailed Documentation

Documentation

Computes the natural logarithm of the absolute value of the gamma function on input.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.

Computes the natural logarithm of the absolute value of the gamma function on input.

input (Tensor) – the input tensor.

out (Tensor, optional) – the output tensor.
