

torch.mps.current_allocated_memory#

https://pytorch.org/docs/stable/generated/torch.mps.current_allocated_memory

Description:

Returns the current GPU memory occupied by tensors in bytes. The returned size does not include cached allocations in memory pools of MPSAllocator.

Function Signature

```
torch.mps.current_allocated_memory()[source]#
```

Return type

Returns:

int

Notes & Warnings

NOTE

Note The returned size does not include cached allocations in memory pools of MPSAllocator.
