

torch.mps.driver_allocated_memory#

https://pytorch.org/docs/stable/generated/torch.mps.driver_allocated_memory.

Description:

Returns total GPU memory allocated by Metal driver for the process in bytes. The returned size includes cached allocations in MPSAllocator pools as well as allocations from MPS/MPSGraph frameworks.

Function Signature

```
torch.mps.driver_allocated_memory()[source]#
```

Return type

Returns:

int

Notes & Warnings

NOTE

Note The returned size includes cached allocations in MPSAllocator pools as well as allocations from MPS/MPSGraph frameworks.

Detailed Documentation

Documentation

Returns total GPU memory allocated by Metal driver for the process in bytes.

The returned size includes cached allocations in MPSAllocator pools as well as allocations from MPS/MPSGraph frameworks.

Returns total GPU memory allocated by Metal driver for the process in bytes.

The returned size includes cached allocations in MPSAllocator pools as well as allocations from MPS/MPSGraph frameworks.
