

torch.mtia.stream#

<https://pytorch.org/docs/stable/generated/torch.mtia.stream.html>

Description:

Wrap around the Context-manager StreamContext that selects a given stream. stream (Stream) – selected stream. This manager is a no-op if it's None. In eager mode stream is of type Stream class while in JIT it doesn't support torch.mtia.stream

Function Signature

```
torch.mtia.stream(stream)[source]#
```

Parameters

Return type

Returns:

StreamContext

Notes & Warnings

NOTE

Note In eager mode stream is of type Stream class while in JIT it doesn't support torch.mtia.stream
